<body>

<h1>planned website based on MY learning in w3school</h1>

<p>The HTML <code>button</code> tag defines a <code>clickable button</code> and also it is
<code>more creative.</code></p>

<p>The tags <code>background-color</code> property defines the <code>background color of an
element.</code> </p>

<code>Plan and design</code> a clear site structure, considering the main categories and subtopics.

<p><code>Create wireframes</code></p>
 to visualize the layout and flow of the website.

<p>The following example displays about my plans that I learn in w3schools:</p>

<ul>
  <li><data value="21053"><code>Domain and Hosting</code></data></li>
  <li><data value="21054"><code>Website Architecture</code></data></li>
  <li><data value="21055"><code>Content Creation</code></data></li>
</ul>

</body>
</html>
